

SUNSKY® POLYCARBONATE SKYLIGHT & SIDELIGHT PANELS

SUNSKY Polycarbonate Panels offer multiple advantages over corrugated panels. Designed specifically to withstand punishing climates and harsh exterior conditions, Sunsky panels are ideal for agricultural, patio cover, and industrial workshop applications.

Features and Benefits:

- Polycarbonate panels are virtually unbreakable, offering up to 20 times greater impact resistance compared to a fiberglass panel.
- Panels retain optical clarity far better than any other glazing material for increased light transmission, while offering 100% UV protection. UV protection is only on the standard (non-reversed) side of the panel.
- Panel profiles can handle extreme climates (-40°F to 270°F).
- Panel provides highest resistance to wind uplift (UL 580 Class 90) and hail protection.
- All panels come with 10-Year warranty.

Panel	Length	Thickness	Color
PBR Panel	8', 10', & 12'	0.8mm	White & Clear
HR-36®	12'	0.8mm	White
Nu-Wave® Corrugated	12'	0.8mm	White

SUNSKY Polycarbonate panels match up to AEP Span's most popular metal panel profiles.
